Personal precautions: Contaminated surfaces will be extremely slippery. Wear personal protective equipment.

Environmental precautions

**Environmental precautions:** Should not be released into the environment.

# Methods and material for containment and cleaning up

**Methods for containment** Prevent further leakage or spillage if safe to do so.

Methods for cleaning up: Absorb spill with inert material (e.g. dry sand or earth), then place in a chemical waste

container.

# 7. HANDLING AND STORAGE

#### Precautions for safe handling

Handling Always replace cap after use. Handle in accordance with good industrial hygiene and safety

practice.

## Conditions for safe storage, including any incompatibilities

Storage Conditions Keep containers dry and tightly closed to avoid moisture absorption and contamination

#### 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

#### Control parameters

**Exposure Guidelines** Contains mineral oil, vegetable oil, and/or synthetic oil. Under conditions which may

generate mists, observe the OSHA PEL of 5 mg/m³, ACGIH STEL of 10 mg/m³.

#### Appropriate engineering controls

Engineering measures to reduce

exposure:

Ensure adequate ventilation, especially in confined areas.

#### Individual protection measures, such as personal protective equipment

Respiratory protection: Breathing apparatus needed only when aerosol or mist is formed.

Hand protection: Impervious gloves Eve protection: Safety glasses

Skin and body protection: Usual safety precautions while handling the product will provide adequate protection

against this potential effect

Avoid contact with skin, eyes and clothing. Wash off with soap and water **General Hygiene Considerations**
